

TRELIA DATA

ENVIRONMENTAL SOFTWARE

Trelia Data provides the most current, advanced and adaptable software and hardware data packages available to the environmental monitoring industry.

From a team with over 80 years of combined experience in environmental and process software development, this fresh approach has brought about the most flexible software, utilising 2020 technology and a new 2020 vision. We have cut ties with the old and outdated, and used our extensive insight and experience to create new capabilities and opportunities for our users. With the ability to connect to current analysers and networks, as well as to incorporate a platform for IoT and beyond, these advancements have been made possible through a strong commitment to, and impressive record of, pushing the boundaries and adapting to the new, while maintaining a reputable stability.

Introducing, Converge, a versatile platform that can accommodate your current and future data needs. When combined with the ConvergeIO Data Logger, you have instant adaptability for all your data accessing requirements.
